

About me

As a passionate and dedicated software developer I began learning IT at a very young age. Over the past four years, I have been developing my Fullstack skills, focusing on building innovative and robust webs and apps using new technologies with client communication, API integration and AI features. Additionally, I have experience with Docker, GIT, AI, AWS, Google Cloud, Scrum method, microservices and Trello/Jira.

Alongside my React, Typescript and Node expertise, I have worked with HTML, CSS, Flutter, Next and more, successfully contributing to and leading multiple projects.

Top Experience

Since 2021

Several projects

Fullstack and Frontend Developer

My overall experience consists in:

- Working closely with the backend teams
- Dealing with the whole lifecycle of a project from gathering requirements, design, implement and deploy to production
- Used to work with tight deadlines and under pressure
- Designing UI/UX, pixel perfect, bringing creative ideas
- Building APIs with several languages like python and nodes
- API, Cloud, Plugins and databases management
- AI implementing
- Optimizing work time and code

Education

As for my education I have studied a middle degree in IT learning several programming languages and IT basics.

This degree complemented with all the latests docs and advanced practical courses give me in-depth knowledge to give reliable code.
